

Kalkitech SYNC Gateways: GPC 2.18.0 Released

January 7, 2011

Kalkitech has updated its SYNC field level gateways with GPC 2.18.0. All the gateway models now support the following features:

1. **Automatic mapping** -- Now user can automatically map the master data points to the slave. The algorithm chooses best possible mapping for the selected master point or complete master data. This reduces engineering time needed for completing configuration for the gateways.
2. **Profile export and import to / from excel** --All the profiles for the masters can be exported to or imported from Excel. This enables user to do the complete configuration in Excel using all the features that enables easy configuration from their IO list input.
3. **Multiple IP nodes under TCP channels** -- Provided option to configure the IP under channel or node for all TCP channels. This allows user to run multiple connections under same thread which is essential for configuration involving high number of TCP nodes.
4. **CID, SCD,IID files importing in IEC61850 client and server channels**

About Kalkitech

KALKI Communication Technologies Limited (Kalkitech) was founded in 1998, with the vision of becoming the leading provider of standard-based, Control, Communication and Computing solutions to OEMs, System Integrators and End-Users in the energy industry. Continuous innovation through research and development is at the core of Kalkitech's corporate philosophy aimed at creating a Whole New World of Intelligent Energy Systems.
